

Assessor		RISK ASSESSMENT of CAMP FIRE	Location	
			Persons affected	

Harm	1= Injury might need first aid. 2= Off work three or more days but should recover. 3 = serious injury may not fully recover , death
Likelihood Consider present controls how likely is there to be an injury/ accident	1 = Unlikely 2 = Likely 3 = Certain
Level of Risk	1-2 Low = Review Annually 3-4 Medium= Reduce risk considering costs, If not monitor procedure 6-9 High=Act Now

Events lead to harm	Describe Harm	H	Controls in place	L	Risk
☒ Terrain	☒ Fire Spread	3	<ul style="list-style-type: none"> ☒ Designated location that is prepared for that purpose, away from other activities. ☒ Designated safe area away from the edge of the fire. ☒ Briefing on keeping safe by campfire ☒ Easy access to water, sand buckets or other appropriate extinguishing medium. ☒ Fire extinguished and made safe at the end of the session. 	1	M
	☒ Ejected Material	3	<ul style="list-style-type: none"> ☒ Monitoring of fire throughout to ensure it does not become too large or unstable ☒ No camp fire to be larger than 1.5 meters tall [from ground to uppermost log] ☒ Ensure that the height of the campfire is not greater than the distance from the campfire to the participants. 	1	M
	☒ Slips/trips & falls ☒ Burns	3	<ul style="list-style-type: none"> ☒ Briefing on the environment ☒ First Aid trained staff / First aid kit ☒ Easy access to water, sand buckets or other appropriate extinguishing medium. 	1	M
☒ Weather	☒ Fire Spread	3	<ul style="list-style-type: none"> ☒ Monitor weather & suspend or cancel if the wind conditions cause safety to be affected. 	1	M
	☒ Lightening / storms	3	<ul style="list-style-type: none"> ☒ Session to cease immediately and appropriate shelter found. ☒ Weather forecasts checked prior to campfire. 	1	M
☒ Equipment	☒ Burns	3	<ul style="list-style-type: none"> ☒ Fire lighting aids used according to manufacturer's instructions, in minimum quantities and only if required. ☒ First Aid trained staff – First aid kit 	1	M
